Hiring Manager

JPMorgan Chase & Co.

India

Application for Software Development Engineer

Dear Hiring Manager,

I am writing to express my interest in the Software Development Engineer role at JPMorgan Chase & Co.. Having been invited to join your Talent Network, I am eager to explore opportunities where I can contribute to the innovative work being done across the Global Technology Division.

I am currently pursuing a Master of Computer Applications at Siddaganga Institute of Technology, where I have achieved a CGPA of 8.8. Through my academic training and internships, I have built a strong foundation in full-stack development using React, Node.js, Express.js, and MongoDB. My experience also extends to Java, TypeScript, SQL, and modern tools such as Git, Figma, and Postman. These experiences have not only strengthened my technical skills but also improved my ability to collaborate within agile teams and deliver scalable, user-focused solutions.

I admire JPMorgan Chase's commitment to technology-driven innovation and its inclusive workplace culture. I am confident that my adaptability, problem-solving abilities, and passion for continuous learning will allow me to quickly integrate with your teams and contribute to impactful projects.

Thank you for considering my application. I would welcome the opportunity to further discuss how my skills and experiences align with the goals of JPMorgan Chase.

Sincerely,

Prajwal D R
